

We  Our Lakes!

Pope County, Minnesota, features some of the most pristine and beautiful shoreline in the state, home to a lush variety of plant and animal life. Just the perfect setting for lakefront property.

Over the years, Pope County shorelines have attracted new residents and home builders to the area. The residents know their enjoyment of the lakes and value of their property depends on keeping the shoreline clean and intact.

In this helpful and engaging video, you can learn more about best management practices—or BMPs—for maintaining your home in such a way that minimizes impact against the lake and surrounding wildlife.

So join us for a journey around the lakes of Pope County as we discuss ideas about septic systems, fertilizers, boat uses, and other practices that can beautify your property while keeping the lake clean and the plant life green.

It's the Pope County way, and best management practices insure that all of us will be able to enjoy these lakes for many years to come.
